[00:00:09]

meeting a truck driver that is working my phone or laptop

[00:00:19]

based upon what model of a speech to text and also we are using some asian model of glamour we have tried with multiple months

[00:00:27]

this model was very good with our work and this have a recording limit of more than hundreds of later

[00:00:48]

for much what we are doing that rather than just making one whole big recording and also using like we're just taking three seconds of each voice and that is that some right that on local real time all are happening and also like in the background regarding it and everything in the back and then

[00:00:52]

what happened that it goes to the park and all of us
